

## Workshop 2005 Leading the Way

Chris Johnson:

Chris has a B.A.Sc. in Civil Engineering from the University of British Columbia and is registered as a Professional Engineer in B.C. He has sixteen years of consulting engineering experience and has completed numerous master drainage plans and integrated storm water management plans throughout the province. Chris was the primary author of the GVRD's Template for Integrated Stormwater Management Planning. The Template sets out how municipalities in the lower mainland, through their Liquid Waste Management Plan, will meet their stormwater commitments over the next twelve years.

Chris leads the infrastructure Planning Group at Kerr Wood Leidal Associates Ltd. He is currently involved in seven projects throughout the Lower Mainland evaluating the effectiveness of Low Impact Development measures, including two featuring the performance of green roofs.
